

# Schneider Education Project

*Education, Empowerment, Excellence*

The Schneider Education Project uses the possibilities of the global internet to bring education, empowerment, and excellence together in order to enable unique projects, platform, services, and opportunities with a focus on education and youths.

## **Science and Education**

Education and knowledge are essential for the technological progress, great achievements, and global prosperity. The projects and services of the Schneider Education Project cover a variety of areas and subjects. The central focus lies on projects related to scientific and technological disciplines, which ranges from mathematics far to environmental sciences.

## **Youth Opportunities**

A majority of projects aims in particular for the empowerment of students and youths.

## **Global Thinking**

One of the key values of the Schneider Education Project is global thinking and international exchange: We live in a modern time in which the internet connects the world more than ever before - there is a lot of potential in this development and the Schneider Education Projects takes advantage by realizing projects, services, ideas, and more on an international level.

## **Services and Ideas**

The Schneider Education Project summarizes, realizes, and offers various ideas, projects, and services: This includes online platforms to enable global exchange, infrastructure for groups and clubs on various topics, and competitions to achieve education and excellence. New projects and services are added continuously to enable more opportunities and features.

## **About SEP**

The Schneider Education Project was started by Fabian Schneider - a passionate youth born in Germany, dedicated to research, journalism, global exchange, and entrepreneurship. The SEP strives for education, empowerment, and excellence!
